I am writing to apply for the Mortgage Processor position at LBC Mortgage. I understand that LBC Mortgage has over 20 years of industry experience and is looking for someone who can manage loan files efficiently from application through closing. While my professional background is in software engineering, I have developed strong organizational, analytical, and communication skills that are directly applicable to mortgage processing.

In my previous work as a web developer, I managed multiple projects simultaneously, reviewed detailed documentation for accuracy, and coordinated with cross-functional teams including clients, developers, and stakeholders. I am accustomed to working under deadlines, maintaining organized records, and ensuring that every detail is accounted for before moving to the next stage. These habits of precision and thoroughness align well with the responsibilities of reviewing loan applications, collecting borrower documentation, and submitting complete packages to underwriting.

One area that particularly interests me about this role is the opportunity to work in a structured, compliance-driven environment where accuracy and clear communication are essential. I am comfortable communicating with borrowers, loan officers, and third parties to gather missing information and resolve conditions. I am also experienced with CRM and database systems, which would allow me to adapt quickly to your mortgage LOS platform.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am available to work during PST business hours and am looking for a long-term opportunity where I can contribute to a stable and growing team. I have attached my CV for your review and welcome the chance to discuss how my background can support LBC Mortgage’s continued success.

Sincerely,

Md Shahanur Islam Shagor
