I am writing to express my interest in joining THE THIRD FLOOR Inc. as part of your Technology team. Your work in visualization for major studios like Disney, Marvel, and Netflix is impressive, and I would welcome the opportunity to contribute to the technical infrastructure that supports such high-profile productions.

My background is in full-stack web development and AI engineering. Over the past four years, I have built scalable web applications using Laravel, Next.js, React, TypeScript, and Node.js. I focus on clean architecture, real-time features, and reliable deployment. My experience includes designing RESTful APIs, implementing role-based access control, integrating payment gateways, and optimizing database performance with MySQL and Redis.

In previous professional roles, I delivered production applications that required close collaboration with stakeholders and engineering teams. I built real-time features using WebSockets, implemented secure authentication systems, and deployed applications on Linux servers with Docker and CI/CD pipelines. I also worked on AI-powered systems, including object detection pipelines and intelligent assistants, which gave me practical experience bridging software engineering with AI capabilities.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the chance to discuss how my technical skills could support THE THIRD FLOOR’s ongoing projects.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
