I am writing to apply for the Environmental Scientists position at STEM Sync AI. The opportunity to contribute to biology and environmental science evaluation work is genuinely interesting to me, and I believe my technical background can support your team's objectives.

My work has consistently involved building systems that process, analyze, and present data in meaningful ways. Through my experience developing AI-powered applications and full-stack platforms, I have become comfortable working with complex datasets, integrating APIs, and creating tools that help users make informed decisions based on structured information.

One area where my background aligns with this role is in building evaluation and analysis systems. I have developed applications that process user data, generate reports, and provide AI-driven insights. These projects required careful attention to data accuracy, workflow design, and output quality, skills that are directly relevant to scientific evaluation work.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to STEM Sync AI's evaluation work.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
