I am writing to apply for the Werkstudent (m/w/d) Social Media Marketing position at spized GmbH. Your platform, which enables athletes to design custom jerseys through a 3D configurator, combines creativity with technology in a way that I find genuinely interesting.

Although my primary background is in software engineering, I have developed a strong sense for visual design and digital trends through my work. I have hands-on experience with design tools like Figma and have built responsive, visually polished user interfaces using Tailwind CSS and modern frontend frameworks. This gives me a practical understanding of what makes content engaging and visually appealing across different platforms.

I am fluent in English and have working knowledge of German, which directly supports your need for managing both English-language Instagram content and German-language community channels. I am comfortable taking initiative, planning content, and analyzing performance metrics to improve engagement.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can contribute to spized's social media growth.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
