I am writing to apply for the Werkstudent SEO-Editor position at Dvision. The combination of content strategy, client collaboration, and AI-supported workflows described in the role aligns well with my background as a software engineering student and my experience building digital platforms.

What stands out to me about Dvision is the focus on using AI to create smarter, more effective content. As someone who has worked with AI tools in real projects, I understand how technology can enhance content creation without replacing the human editorial touch. I am interested in contributing to a team that sits at this intersection of content and technology.

Through my project work, I have built full-stack applications where content structure, user experience, and clear information architecture were essential. For example, I developed a travel agency platform that required managing multilingual content, tour descriptions, and booking workflows. This taught me how to organize and present information in a way that serves both users and business goals.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Dvision’s content and SEO work.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
