I am writing to apply for the Werkstudent HR im Bereich People Development position at AdEx Beratungs GmbH. Your focus on digital transformation and the use of modern technologies in HR, particularly artificial intelligence, caught my attention. I am a software engineering student with practical experience in web development and AI integration, and I believe I can contribute to your team.

One area where I can add value is in the maintenance and development of your HR intranet. Through my professional experience as a Web Developer, I have built and maintained full-stack web applications using Laravel, Next.js, and MySQL. I am comfortable working with content management systems and can help keep your intranet updated, functional, and user-friendly.

Another relevant area is the application of artificial intelligence. In my project work, I have integrated AI assistants and APIs into applications, including an AI-powered financial app and a real estate platform. I understand how to work with modern AI tools and can support your team in exploring and implementing AI solutions in HR processes.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am a self-organized and reliable worker, comfortable in virtual settings. I am available for 20 hours per week and am interested in a long-term collaboration. I have attached my CV for your review and would welcome the opportunity to discuss how I can support your People Development team.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
