I am writing to apply for the Business Applications Manager (SAP B1, Magento, Schnittstellen) position at List + Beisler GmbH. Your company's blend of international business and deep coffee expertise, combined with a focus on optimizing business applications, is what draws me to this opportunity.

Through my professional experience as a Web Developer, I have developed and managed web applications using PHP and Laravel, built and integrated RESTful APIs, and worked with MySQL databases. I have experience implementing interfaces between different systems to streamline data flow, which directly relates to the Schnittstellen development and optimization mentioned in your job description.

One area that particularly interests me is the responsibility of analyzing and resolving issues in business applications to ensure smooth operations. In my previous roles, I regularly debugged, optimized performance, and maintained application stability. I am comfortable collaborating with both internal teams and external service providers to improve IT infrastructure, having worked in distributed team environments across different countries.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in application management and system integration can contribute to List + Beisler's continued growth.

Thank you for your consideration.

Sincerely,

Md Shahanur Islam Shagor
