I am writing to apply for the Fachassistent Digitalisierung und IT-Prozesse position at SYLTAX. Your focus on digital transformation and modernizing workflows in a tax consultancy environment aligns well with my background in building and deploying digital solutions.

In my professional experience as a Web Developer, I have worked extensively on introducing new digital tools and optimizing internal processes. I have developed and maintained full-stack applications using Laravel, Next.js, and React, and I have deployed them on Linux servers with Docker and Nginx. This technical foundation allows me to confidently support your team in adopting and managing digital solutions.

One area that particularly interests me is the opportunity to strengthen your Digitalisierungsteam and take ownership of digitalization projects. I have experience implementing authentication systems, role-based access control, and real-time features, and I am comfortable supporting colleagues and clients with IT-related questions. My structured and independent working style helps me stay focused on project goals while collaborating effectively within a team.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to SYLTAX’s digital journey. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
