I am writing to apply for the Prˆ…fungsassistent position at Scheller & Partner PartG mbB. Your firm’s long-standing reputation in tax consulting and auditing, combined with a collaborative team environment, is exactly the kind of setting where I can contribute effectively while continuing to grow professionally.

Although my professional background is in software engineering rather than auditing, the core competencies required for this role â analytical rigor, structured documentation, and meticulous attention to detail â are central to my daily work. Through my experience designing and maintaining complex systems, I have developed a disciplined approach to data integrity, error detection, and process documentation that aligns well with audit workflows.

A relevant example is my work on the Real-Time Server Health Monitoring system, where I built a full-stack dashboard that tracks availability, latency, and performance metrics across multiple endpoints. This project required continuous data validation, precise reporting, and clear documentation of system behavior â skills that translate directly to preparing audit reports and supporting annual financial statement examinations.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my analytical mindset, commitment to accuracy, and ability to learn quickly would make me a reliable addition to your team. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Scheller & Partner.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
