I am writing to apply for the Working Student - Graphic Design (Print & Digital) position at Walt's Comic Shop. Your role combines editorial print design with digital marketing assets, and I am interested in contributing to your team's visual identity across both areas.

Although my professional background is in software engineering and full-stack development, I have consistently worked on the visual and design aspects of every project I have built. Using Figma, I have designed responsive UI layouts, website banners, sliders, and reusable component systems for e-commerce platforms and web applications. This has given me a strong practical understanding of layout, typography, colour theory, and visual communication.

In previous work, I created website banners, sliders, and visual assets for online stores, ensuring consistency across all customer touchpoints. I also built reusable design templates and systems that helped teams maintain a cohesive visual identity without starting from scratch each time. These experiences align well with the print and digital design tasks described in your role.

I am comfortable working across both print and digital formats, preparing assets for different channels while keeping the overall brand identity intact. I am also fluent in English and enjoy collaborating in international teams.

I have attached my CV and portfolio for your review. I would welcome the opportunity to discuss how I can support Walt's Comic Shop with your upcoming design projects.

Sincerely,

Md Shahanur Islam Shagor
