I am writing to apply for the Graphic Designer (Print & Digital) position at Walt's Comic Shop. Your reputation as one of Europe's leading comic retailers and the opportunity to work across print, e-commerce, and marketing projects is genuinely appealing.

Although my professional background is in software engineering, I bring a strong visual design sensibility developed through years of building user interfaces and digital products. My experience with Figma, HTML, CSS, and Tailwind CSS has given me a practical understanding of layout, typography, colour, and visual hierarchy. I am comfortable creating reusable templates and maintaining consistent design systems across multiple projects.

In previous work developing e-commerce platforms, I designed website banners, sliders, and visual assets for online stores. I also built responsive UI components and maintained brand consistency across web and mobile interfaces. This experience translates directly to creating social advertising assets, YouTube thumbnails, and digital marketing materials for Walt's Comic Shop.

In addition to my technical and design experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV and portfolio for your review. I am available to start immediately and look forward to contributing to Walt's Comic Shop's visual identity.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
