I am writing to apply for the Technical Support Specialist (1st & 2nd Level) position at your HealthTech client in Berlin. Supporting medical practices with a modern cloud-based practice software and contributing to the digitalization of healthcare is a meaningful challenge that aligns with my technical background and service-oriented approach.

Through my professional experience as a web developer, I have developed strong analytical and structured problem-solving skills. I am comfortable diagnosing technical issues, working with databases like PostgreSQL, and using Docker for containerized environments. My familiarity with Linux servers, networking fundamentals, and monitoring tools allows me to handle both 1st and 2nd level support tasks effectively.

One area that particularly interests me is the opportunity to support device and lab integrations (LDT/GDT) and work with the Telematikinfrastruktur. While my direct experience is in software development and system deployment, I have a solid understanding of how APIs, data communication, and secure interfaces operate in practice. I am confident I can quickly adapt to the specific technical environment of a HealthTech SaaS platform.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical support skills and customer-focused mindset can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
