I am writing to apply for the Designer role at TED Conferences. TED's mission to discover and spread ideas that spark imagination and catalyze impact resonates with me. I have long admired how TED combines thoughtful design with compelling storytelling to create experiences that reach millions worldwide.

My background is in software engineering, but design has always been central to my work. I have hands-on experience with Figma, which is a must for this role, and I have built complete brand systems and user interfaces for web and mobile applications. I focus on typography, color, composition, and visual storytelling to create cohesive and engaging designs.

In previous work, I designed and developed responsive, SEO-friendly UIs using Next.js, Tailwind CSS, and Material UI. I have experience creating marketing assets for digital channels, including email, social media, and web. I understand the importance of extending design systems across different platforms and ensuring consistency from concept through production.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
