I am writing to apply for the Scrum Master position at Avum Inc. Your focus on facilitating Agile delivery for development and QA teams, coordinating with Release Management, and ensuring consistent value through each sprint aligns with my experience in structured software delivery and cross-team collaboration.

Over the past four years, I have worked as a software engineer in both remote and onsite environments, collaborating with developers, QA engineers, and project stakeholders to plan, build, and ship features on schedule. My technical background gives me a practical understanding of the development lifecycle, which helps in removing impediments and communicating effectively with engineering teams.

In my recent role, I was responsible for coordinating feature delivery across frontend and backend teams, tracking progress against sprint goals, and ensuring that dependencies between teams were resolved early. I worked closely with team members to maintain focus, adapt to changing priorities, and keep the sprint backlog organized. This experience has given me a solid foundation in facilitating the kind of ceremonies and workflows described in this role.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can support your teams at Avum Inc.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
