I am writing to apply for the Web Designer position at Regex SEO. Your 100% remote setup and focus on flexibility align well with how I work best.

My web development background includes building responsive, user-friendly interfaces using HTML, CSS, JavaScript, Tailwind CSS, and Bootstrap. I focus on clean layouts, consistent spacing, and designs that work smoothly across devices. I also have experience with React and Next.js for more interactive frontend work.

In my professional experience as a Web Developer, I created responsive UIs and collaborated with teams to deliver functional, visually consistent web applications. I am comfortable working independently in a remote environment and communicating clearly with stakeholders.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Regex SEO.

Thank you for your time.

Sincerely,

Md Shahanur Islam Shagor
