I am writing to apply for the Environmental Scientists position at STEM Sync AI. The role of a Biology / Environmental Science Evaluator aligns with my background in building intelligent systems that process complex data and deliver actionable insights.

Through research and development work, I have designed systems that combine AI, computer vision, and real-time data analysis. My experience includes developing a wireless vision-aid system using YOLOv8n for object detection, which required processing environmental data efficiently on edge devices. This work involved optimizing inference pipelines, handling real-time sensor data, and ensuring reliable performance in varied conditions.

In previous work, I built full-stack applications that manage large datasets, automate workflows, and provide clear reporting. These projects required careful attention to data integrity, system reliability, and user-friendly interfaces.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills can contribute to the evaluation work at STEM Sync AI.

Sincerely,

Md Shahanur Islam Shagor
