I am writing to express my interest in the HR Software Berater:in / Consultant position at Fynancy GmbH. Your work as a Microsoft Partner and official Expert Partner of Factorial, helping mid-sized companies digitize their HR processes, caught my attention. I am drawn to the opportunity to guide clients through digital transformation and deliver practical, efficient solutions.

Through my professional experience as a web developer, I have worked on full-stack applications using Laravel, Next.js, and Node.js, building RESTful APIs, implementing authentication and role-based access control, and integrating third-party services. I have also deployed and maintained applications on Linux servers with Docker and Nginx. This technical foundation gives me a solid understanding of how modern software platforms work and how they can be configured to meet specific business needs.

One area that particularly interests me is analyzing existing workflows and designing tailored solutions within a platform. In previous projects, I have worked closely with stakeholders to understand requirements, implement features, and support users through the transition. I am comfortable bridging the gap between technical capabilities and business objectives, which I believe is essential for a consulting role.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background can contribute to Fynancy’s client projects.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
