I am writing to apply for the ERP Entwickler:in / Developer position at Fynancy GmbH. Your focus on digitalizing business processes for Mittelstand companies using Microsoft Dynamics 365 Business Central, Power Automate, and Power BI aligns well with my background in building practical, process-driven software solutions.

With over four years of professional experience in full-stack web development, I have worked extensively with Laravel, PHP, MySQL, and modern frontend frameworks like Next.js and React. My work has consistently involved analyzing requirements, designing scalable architectures, and delivering end-to-end solutions that support real business operations.

What stands out to me about this role is the emphasis on understanding customer processes and guiding projects from initial analysis through to go-live. In my previous positions, I have been responsible for gathering requirements, implementing features, and maintaining systems post-deployment. I am comfortable working closely with both technical teams and non-technical stakeholders to ensure solutions are practical and effective.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills and experience can contribute to Fynancy’s projects.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
