I am writing to apply for the ERP Berater:in position at Fynancy GmbH. Your focus on helping mid-sized companies digitalize their operations through Microsoft Dynamics 365 Business Central, Power Automate, and Power BI is a compelling mission. I am interested in contributing to a team that values practical, end-to-end project delivery.

Through my professional experience as a Web Developer, I have developed a strong analytical approach to understanding business processes and translating them into technical solutions. I have worked on full-cycle projects, from initial requirement gathering to deployment and ongoing support. This has given me a solid foundation in analyzing workflows, identifying improvement areas, and implementing solutions that work in real-world environments.

In previous work, I have collaborated closely with development teams to build and maintain scalable applications. I am comfortable acting as the bridge between technical and non-technical stakeholders, ensuring that requirements are clearly understood and that the final solution meets operational needs. My experience with REST APIs, database design, and system integration has prepared me to work effectively within ERP ecosystems.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background in software engineering and process-oriented thinking can contribute to Fynancy’s client projects.

Sincerely,

Md Shahanur Islam Shagor
