I am writing to apply for the ERP Berater:in Microsoft Dynamics 365 Business Central position at Fynancy GmbH. Your work as a Microsoft partner helping mid-sized companies digitize their operations through Business Central, Power Automate, and custom applications aligns with my interest in building practical, process-driven solutions.

Through my professional experience as a Web Developer, I have developed a strong ability to analyze business processes, translate requirements into technical solutions, and manage projects from initial analysis through go-live. I enjoy understanding how systems work end-to-end and ensuring that the final solution meets real operational needs.

One area that particularly interests me is the end-to-end project lifecycle described in your role. In my previous work, I have been responsible for gathering requirements, designing solutions, coordinating with development teams, and ensuring successful deployment. This experience has given me a practical understanding of what it takes to deliver solutions that work in daily operations.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my analytical approach and project experience can contribute to Fynancy’s consulting team.

Sincerely,

Md Shahanur Islam Shagor
