I am writing to apply for the Business Partner Finance / Financial Performance role at AVS Services GmbH. Your company's position as a leader in traffic safety solutions and your focus on using modern technology, including AI-driven analytics, to drive profitability is what draws me to this opportunity.

My background is in software engineering, where I have developed a strong analytical mindset and a data-driven approach to problem-solving. I have hands-on experience building dashboards and working with databases like MySQL and PostgreSQL to extract, analyze, and present data. This technical foundation allows me to understand the underlying data structures and contribute to the digitalization and automation of KPI reporting.

A relevant example is my work on an AI-powered financial application. In this project, I was responsible for developing the backend API, integrating payment systems, and setting up automated workflows. This experience involved analyzing data flows, ensuring data integrity, and building systems that provide clear, actionable insights. It directly relates to your goal of using technology, such as AI-powered analyses and predictive forecasting, to identify financial trends.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my analytical skills, technical aptitude, and interest in leveraging technology for financial performance can contribute to your team. My CV is attached for your detailed review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
