I am writing to apply for the Head of M&A Origination role at NexDash. Your vision of building Europe's first fully electrified, AI-orchestrated neo-carrier for zero-emission freight is ambitious and timely. The idea of combining logistics, energy, and intelligent operations into one integrated platform is exactly the kind of real-world challenge I find compelling.

Although my professional background is in software engineering, I have developed strong skills in active listening, structured documentation, and persistent follow-up through years of client-facing project delivery. I understand how to build trust with stakeholders, identify their core needs, and guide conversations toward clear outcomes. These skills transfer directly to sourcing and qualifying acquisition targets in the Mittelstand.

I am based in Russia and ready to travel extensively across the DACH region. I speak fluent English, have working knowledge of Russian and Hindi, and am actively learning German to communicate effectively with family-owned Speditionen. I am comfortable with high outreach frequency, systematic follow-up, and maintaining a structured deal funnel.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
