I am writing to apply for the Chief of Staff position at Voltvera. Your mission to reduce industrial energy costs through intelligent battery storage solutions and accelerate the energy transition in Germany is both timely and impactful. I am drawn to the combination of strategic depth and hands-on execution that Voltvera values.

My background is in software engineering and full-stack development, where I have spent over four years building scalable systems, managing complex projects, and working across technical and business functions. This experience has given me strong analytical skills, a structured approach to problem-solving, and the ability to translate technical challenges into clear business decisions.

One area that particularly interests me is the operational and strategic support role Voltvera is looking for. In my previous work, I regularly prepared market analyses, business cases, and decision templates for internal stakeholders. I also coordinated with external partners, managed project timelines, and took ownership of deliverables from start to finish. I am comfortable working at the intersection of business, technology, and operations.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am excited by the steep learning curve Voltvera offers and the chance to grow into a leadership role within a fast-scaling energy-tech company. I am ready to contribute with ownership, structure, and a bias for action. My CV is attached for your review.

Sincerely,

Md Shahanur Islam Shagor
