I am writing to apply for the Life Cycle Product Manager (m/w/d) position at Kopani Consulting GmbH. The role involves managing key accounts, coordinating customer inquiries, and leading product lifecycle projects in the medical technology sector. While my professional background is in software engineering, I bring strong technical project coordination skills, experience working with cross-functional teams, and a structured approach to managing complex workflows.

In my professional experience as a Web Developer, I worked closely with stakeholders to understand requirements, estimate effort and timelines, and coordinate delivery across multiple teams. I regularly communicated with clients, managed expectations, and ensured that technical solutions aligned with business needs. This experience has given me a solid foundation in customer-facing project coordination and cross-functional collaboration.

One area that particularly interests me is the responsibility of independently leading projects such as aging studies, material changes, or service life extensions in coordination with laboratories and departments. In my previous roles, I have taken ownership of feature delivery, managed dependencies across teams, and ensured that projects moved forward without bottlenecks. I am comfortable working in environments where precision, documentation, and cross-team communication are essential.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my project coordination and technical background could contribute to your client’s team in Stuttgart.

Sincerely,

Md Shahanur Islam Shagor
