I am writing to apply for the Junior Online Marketing Manager position at Cyrus Digital GmbH. Your structured training program and clear development path from junior to senior account responsibility align well with my approach to learning and growth.

Although my professional background is in software engineering, I bring a strong analytical and data-driven mindset that is directly relevant to performance marketing. In my work building and optimizing web applications, I regularly tracked metrics, analyzed user behavior, and made data-informed decisions to improve outcomes. I am comfortable working with numbers, identifying trends, and iterating based on measurable results.

What draws me to this role is the opportunity to learn performance marketing from the ground up in a structured environment. I have experience working independently and taking ownership of tasks, which I believe will serve me well as I progress toward managing my own accounts. I am looking for a role where I can apply my analytical skills while learning a new discipline, and your training model offers exactly that.

In addition to my technical experience, I work effectively across teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am based in Voronezh and ready to relocate to Munich.

I have attached my CV for your review and look forward to the opportunity to discuss how I can contribute to Cyrus Digital.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
