I am writing to apply for the Werkstudent:in Customer Support (Niederlˆndisch) position at Speekly. Your platform connecting over 100,000 creators with 12,000 brands is an impressive ecosystem, and I am drawn to the idea of being the primary point of contact for your Dutch-speaking customers.

What stands out to me about this role is the emphasis on ownership and deep product knowledge rather than just handling tickets. I am a quick learner who enjoys understanding software systems thoroughly. In my previous work as a Web Developer, I collaborated closely with stakeholders to translate customer needs into product improvements, which has given me a practical understanding of how feedback loops between support and engineering teams drive real product value.

I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and I am committed to reaching fluency in Dutch and German. I am on TikTok and Instagram daily and have a strong sense of what content resonates with audiences, which aligns with your need for someone who understands social media trends and creator dynamics.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am structured, reliable, and proactive, and I am looking for a role where I can take real responsibility and grow with a fast-scaling startup.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Speekly’s success.

Sincerely,

Md Shahanur Islam Shagor
