I am writing to apply for the CEO position at your client, a premium fast-casual food tech company in Germany. The opportunity to lead a growing, tech-enabled brand focused on fresh, healthy meals and operational excellence is compelling.

My professional background is in software engineering, where I have designed and delivered full-stack web applications and AI-powered systems. I have built scalable platforms using Laravel, Next.js, and Node.js, integrated secure payment gateways, and deployed real-time features with WebSockets. I also have experience with Docker, Linux servers, and CI/CD pipelines.

One area that particularly interests me is using technology to improve operational efficiency and customer experience. In previous work, I developed a multi-vendor e-commerce ecosystem with role-based access control and real-time notifications, and an AI-powered real estate platform with subscription plans and automated workflows. These projects required coordinating complex systems, managing data flow, and ensuring reliability at scale.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
