I am writing to apply for the (Junior) HR Manager position at Picus Capital GmbH. Your firm's focus on partnering with ambitious founders and building market-shaping technology companies is something I find genuinely compelling, and I am interested in contributing to your global HR team.

Through my work as a software engineer, I have developed strong process management and organizational skills. I have experience coordinating with international teams, managing project lifecycles from initiation to delivery, and continuously improving workflows. I am comfortable taking ownership of administrative tasks and ensuring that operations run smoothly.

One area that particularly interests me is the identification and implementation of automation potential in HR administration. In my technical projects, I have consistently looked for ways to streamline repetitive tasks and improve efficiency. I believe this mindset can be directly applied to optimizing HR processes, from onboarding to employee data management.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my structured, proactive approach to the Picus team and support your mission of driving technological change. I have attached my CV for your review and look forward to the possibility of discussing how I can contribute to your HR operations.

Sincerely,

Md Shahanur Islam Shagor
