I am writing to apply for the Logistics Coordinator position at Loadsmart. Your company's focus on innovative logistics technology is interesting, and I am keen to contribute to a team that streamlines freight operations through smart systems.

My professional experience has been in software engineering, where I have built and maintained full-stack web applications using Laravel, Next.js, and Node.js. I have designed RESTful APIs, managed MySQL databases, and implemented real-time features using WebSockets. These skills translate directly to coordinating logistics workflows, tracking shipments, and ensuring data accuracy across systems.

In previous roles, I have worked on projects that required careful coordination between frontend and backend systems, third-party integrations, and deployment on Linux servers. I am comfortable managing multiple moving parts, communicating with stakeholders, and ensuring that operations run smoothly.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background can support Loadsmart's logistics operations.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
