I am writing to express my interest in the Cyber Operations Management System (COMS) Demonstration opportunity with EMW, Inc. The work of building a mock-up environment on the NATO Software Factory and capturing requirements for critical cyber operations systems aligns with my technical background and interest in secure, well-documented systems.

Through my professional experience as a Web Developer, I have worked extensively with Linux servers, Docker, Nginx, and CI/CD pipelines. I have deployed and maintained applications in production environments, managed database systems including MySQL and PostgreSQL, and written automation scripts using Python and Bash. This foundation in server management and scripting is directly applicable to setting up and maintaining the COMS mock-up environment.

One area that particularly interests me is the requirement to replicate Jira and Confluence workflows, including dynamic wiki page generation and cross-environment hand-over mechanisms. While my direct experience is with custom-built systems rather than Atlassian administration, I have built real-time features using WebSockets, implemented role-based access control, and worked with dynamic content management in full-stack applications. I am confident in my ability to quickly master the Atlassian ecosystem and deliver the required mock-up environment.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.
