I am writing to apply for the IT Asset Management Program Manager position at Gritter Francona. The opportunity to support a federal ITAM program focused on asset accountability, lifecycle management, and governance aligns with my experience in managing structured project delivery and cross-functional coordination.

Through my professional experience as a Web Developer, I have led the delivery of multiple full-stack applications from planning through deployment. This included managing project schedules, tracking risks and issues, coordinating with stakeholders, and ensuring deliverables were accurate and timely. I am comfortable preparing status reports, maintaining project documentation, and facilitating recurring meetings with both technical and non-technical teams.

A relevant example is my work on a multi-vendor e-commerce ecosystem where I coordinated across customer, seller, and logistics modules. I maintained visibility into dependencies, action items, and delivery milestones while ensuring consistent communication across the project team. This experience taught me how to manage concurrent priorities and keep deliverables aligned with client expectations.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my background can support the ITAM program at Gritter Francona.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
