I am writing to apply for the Events Coordinator position at BusPlanner. Your work providing transportation management software to K-12 school districts across North America is impressive, and I am drawn to the operational backbone role you have described.

While my professional background is in software engineering, the core qualities you are hiring for organization, clear communication, ownership, and comfort with technology are strengths I have developed and applied consistently throughout my career. I have coordinated complex projects with multiple stakeholders across different time zones, managed detailed timelines, and ensured nothing falls through the cracks.

In previous work, I have been responsible for keeping multiple workstreams on track simultaneously, communicating proactively with team members and external partners, and following up until tasks are fully closed. I am comfortable working independently, prioritizing under pressure, and adapting to changing requirements without losing momentum.

I am tech-savvy and already use AI tools like Claude to improve efficiency in my daily work. I am confident in my ability to quickly learn new platforms, manage attendee workflows, support event marketing efforts, and handle the logistics coordination this role requires. I am based in Pakistan and fully available to work Eastern Time (EST) business hours.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my organizational skills and proactive approach can support BusPlanner’s events team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
