I am writing to apply for the Scheduling Coordinator Entry Level position at Travel Planning Careers. This role caught my attention because it focuses on organization, clear communication, and supporting a smooth coordination process, which are areas where I have built strong habits through my work as a software engineer.

Through my experience as a Web Developer, I have developed a disciplined approach to managing tasks, tracking details, and following through on commitments. Coordinating scheduling requests, organizing client information, and maintaining accurate records are responsibilities I have handled regularly while delivering projects on time and within scope.

One area that particularly interests me is the emphasis on structured processes and client-focused coordination. In my previous roles, I worked remotely with teams across different time zones, communicating updates, confirmations, and follow-ups in a timely and professional manner. I am comfortable using email, online platforms, and scheduling tools to keep everything organized and running smoothly.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
