I am writing to apply for the Support Analyst (Tier 1 Support Technician) role at Netrix Global. Your focus on delivering excellent customer experiences and resolving issues efficiently aligns with my own approach to technical support and service delivery.

Through my professional experience as a Web Developer, I have developed strong troubleshooting and problem-diagnosis skills. I am comfortable working with Linux servers, monitoring system health, and following structured processes to resolve issues. My background includes documenting incidents, maintaining accurate records, and collaborating with engineering teams to ensure timely resolutions.

One area that particularly interests me is the emphasis on clear communication and customer education. In previous roles, I regularly communicated technical information to non-technical stakeholders, kept users informed about issue progress, and contributed to knowledge base documentation. I am organized, self-motivated, and able to manage multiple tasks effectively while meeting SLA requirements.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to the Netrix Global team.

Sincerely,

Md Shahanur Islam Shagor
