I am writing to apply for the Public Health Communications Professional role at CuraSenseAI. The opportunity to evaluate and score public health communications appeals to me because it combines analytical rigor with meaningful real-world impact.

Through my work as a software engineer, I have developed strong skills in evaluating content quality, clarity, and effectiveness. Building AI-powered applications has required me to assess how information is structured, how clearly it communicates its purpose, and how well it meets user needs. These same evaluation skills transfer directly to assessing public health communications.

I have experience working across multiple languages and cultures, which has sharpened my ability to understand how messaging resonates with different audiences. My technical background also means I can approach evaluation tasks systematically, ensuring consistency and accuracy in scoring.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my skills can contribute to CuraSenseAI’s evaluation work.

Sincerely,

Md Shahanur Islam Shagor
