I am writing to apply for the General Manager position at Garage Beer. Your brand's approach to building a fast-growing company while keeping work genuine and fun resonates with me. I appreciate the focus on real people doing good work without unnecessary complexity.

My professional background is in software engineering, where I have spent over four years building scalable web applications and data-driven systems. While I do not come from the beverage industry, I bring strong technical and analytical capabilities that directly support the data-driven aspects of this role. I am comfortable working with internal and external data sources, generating insights, and presenting information in clear, visual formats.

One area that particularly interests me is the emphasis on establishing execution routines and driving consistency across teams and partners. In my previous work, I have designed and deployed monitoring dashboards that track real-time system health, availability, and performance metrics. This experience has given me a practical understanding of how to define clear metrics, build routines around them, and use data to drive continuous improvement.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
