I am writing to apply for the Director Field Sales Navy and Marine Corps position at NOBLE. I understand this role requires a senior leader who can drive sales performance while directly engaging with customers and guiding a team. Although my professional background is in software engineering and AI systems, I bring a structured approach to problem-solving, cross-functional coordination, and technical communication that supports field sales operations in complex environments.

Through my work as a Full-Stack and AI Engineer, I have developed strong skills in managing end-to-end project lifecycles, coordinating with multiple stakeholders, and maintaining organized workflows. I have experience using tools like Git for version control, cloud platforms for deployment, and various reporting systems to track progress and performance. These skills translate well to maintaining accurate CRM records, forecasts, and pipeline reporting as outlined in this role.

One area that particularly interests me is the player/coach nature of this position. In my previous roles, I have mentored junior developers, conducted code reviews, and facilitated knowledge-sharing sessions. I am comfortable balancing direct contribution with team guidance, and I understand the importance of reinforcing accountability while supporting individual growth.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
