I am writing to apply for the VP of Sales role at Transform9. Your mission to redefine healthcare access through conversational AI is compelling, and I am interested in contributing to your growth.

My professional background is in full-stack and AI engineering, where I have spent years building scalable platforms and working directly with cross-functional teams. At Explo-IT, I collaborated with stakeholders to deliver products that required clear communication between technical and business sides. This experience has given me a strong ability to translate complex capabilities into value propositions that resonate with enterprise clients.

I have experience analyzing system metrics, optimizing performance, and making data-informed decisions. While my domain is technical, the discipline of using data to drive strategy and results is directly transferable to sales leadership. I am comfortable with CRM tools, forecasting, and reporting to executive leadership.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my background can support Transform9’s growth.

UPBEAT

Sincerely,

Md Shahanur Islam Shagor
