I am writing to apply for the Werkstudent Social Media & Marketing position at Eloquendo GmbH. Your mission to modernize speech therapy through technology and build a nationwide practice group is a compelling vision, and I would welcome the opportunity to contribute to building your brand's presence from the ground up.

Through my work as a full-stack developer, I have gained practical experience in content creation, visual design, and digital communication. I have built and maintained websites and applications where I was responsible for UI design, image and video asset integration, and ensuring a consistent visual identity across platforms. This has given me a solid understanding of how content, design, and user engagement work together to build a recognizable brand.

What stands out to me about this role is the emphasis on shaping strategy and creating content rather than just managing posts. I am comfortable working independently, taking ownership of channels, and developing content ideas that align with a brand's voice. I am also interested in the optional areas of employer branding and performance marketing, and I am eager to learn and contribute in those directions as well.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would be glad to discuss how I can support Eloquendo's social media and marketing efforts.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
