I am writing to apply for the Junior Growth Manager position at handz.on GmbH. Your focus on marketing innovative AI solutions aligns well with my background in full-stack development and AI engineering. I am particularly interested in how handz.on GmbH brings complex AI technologies to market and would welcome the opportunity to contribute to that mission.

Through my work as a Full-Stack & AI Engineer, I have built AI-powered applications that integrate tools like OpenAI and Replicate API. I have developed AI assistants, implemented role-based authentication, and built subscription systems with payment gateways. This technical experience gives me a practical understanding of how AI solutions function and how to communicate their value to different audiences.

One area that particularly interests me is content creation and social media management for technology products. In my previous roles, I have worked closely with stakeholders to translate technical features into clear, compelling messaging. I am comfortable researching potential clients, supporting sales preparation, and maintaining organized workflows. My experience managing full project lifecycles has taught me to take ownership of tasks and follow through independently.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the chance to discuss how my background in AI technologies and structured working style can support handz.on GmbH’s growth efforts.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
