I am writing to apply for the Solution Engineer (m/f/d) Telecommunications position at Infosim GmbH & Co. KG. Your work on StableNet, a network management and business intelligence platform, stands out to me, and I am interested in contributing to its successful deployment in complex telecom environments across Africa.

My technical background is rooted in systems and network-adjacent work. I have hands-on experience with Linux server administration, Docker containerization, and Nginx configuration, which gives me a solid understanding of how large IT infrastructures operate. I am comfortable writing small scripts for automation and troubleshooting using Python and Bash, skills that align with the scripting needs described in your requirements.

One area that particularly interests me is the customer-facing nature of this role. In my previous work, I regularly collaborated with stakeholders to understand their needs, explain technical solutions clearly, and support product rollouts. I am confident I can act as a technical advisor to your Sales team, helping prepare tender offers and delivering compelling product demonstrations.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am available for the freelance engagement starting July 2026 and am prepared to travel regularly to customer sites in and around Lagos, Nigeria. I have attached my CV for your review and look forward to the possibility of contributing to Infosim’s growing presence in Africa.

Sincerely,

Md Shahanur Islam Shagor
