I am writing to apply for the Business Central Spezialist:in position at UPYU by FreeMOM GmbH. Your client's focus on optimizing internal processes, reducing manual tasks, and establishing digital workflows aligns with my experience in building efficient, integrated systems.

Through my professional experience as a Web Developer, I have worked extensively with REST APIs, system integrations, and backend development. I have built and maintained APIs for seamless data exchange between frontend and backend systems, and I have integrated third-party services including payment gateways, social logins, and cloud storage. These experiences have given me a solid foundation in API development and system connectivity, which directly relates to integrating Business Central with third-party systems via APIs and Web Services.

One area that particularly interests me is working with CI/CD pipelines and automated testing. I have deployed and maintained applications on Linux servers using Docker, Nginx, and CI/CD workflows. I am comfortable with code reviews, following development standards, and ensuring code quality through structured processes. My experience with database optimization, caching strategies, and performance tuning has prepared me to contribute to data migration and upgrade projects effectively.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
