I am writing to apply for the Commercial Planning Senior Associate role at SumUp. Your mission to empower small businesses with simple financial tools is something I find genuinely compelling, and the opportunity to work on scalable planning models at the heart of SumUp's commercial engine aligns well with my analytical and technical background.

My experience building data-intensive applications has given me a strong foundation in working with complex datasets and translating them into meaningful business insights. I developed an AI-powered financial platform that processes real-time financial data, generates forecasts, and automates reporting workflows. This required extracting and manipulating data from databases using SQL, building scalable models, and presenting findings to non-technical stakeholders.

In my professional experience as a Web Developer, I owned end-to-end feature delivery, from designing database schemas and building RESTful APIs to deploying applications on cloud infrastructure. I worked closely with cross-functional teams to understand requirements, influence decisions through data, and ensure that technical solutions directly supported commercial goals. This has given me practical experience in acting as a bridge between technical execution and business strategy.

One area that particularly interests me is the migration of commercial planning from spreadsheets to scalable forecasting tools. I have hands-on experience automating manual workflows, building dashboards, and reducing operational overhead through technology. I am comfortable working in environments where priorities shift and structure is still being built, and I enjoy contributing to both the analytical and the operational sides of a business.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to SumUp's Commercial Planning team.

Sincerely,

Md Shahanur Islam Shagor
