I am writing to apply for the Sales Development Senior Manager position at Wellhub. Your mission to make every company a wellness company through a platform that connects employees to fitness, mindfulness, and wellbeing resources is both meaningful and ambitious. I am drawn to the challenge of building a high-value prospecting engine that directly contributes to improving health and happiness across Germany.

My background is in software engineering and AI, where I have spent years designing systems that solve complex problems. I have strong analytical skills and experience using data to identify bottlenecks and optimize performance. I understand how to leverage technologyâ from AI tools to CRM platformsâ to drive measurable business outcomes. This technical foundation gives me a unique perspective on how to maximize ROI from sales tech stacks and coach teams to use them effectively.

In my professional experience, I have worked closely with stakeholders to deliver features that improved user engagement and conversion rates. I have built authentication systems, payment integrations, and real-time features that required careful coordination between engineering, product, and business teams. I am comfortable communicating with both technical and non-technical audiences and translating business needs into actionable plans.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can contribute to Wellhubâ s mission.

Sincerely,

Md Shahanur Islam Shagor
