I am writing to apply for the Fachplaner Elektrotechnik im Ingenieurbˆ…ro position at ETB Solution GmbH. Your focus on sustainable, energy-efficient building concepts and integrated technical planning stands out, and I am interested in contributing to a startup that values cross-disciplinary thinking and customer-oriented solutions.

My background is in software engineering and full-stack development, where I have spent over four years designing and delivering complex technical systems. Through my professional experience, I have developed strong skills in system architecture, project coordination, and technical documentation. I am accustomed to working independently on technical concepts and ensuring that all project deliverables are clearly documented and aligned with quality standards.

One area that particularly interests me is the structured planning and coordination of technical projects from concept through to completion. In my previous work, I have managed end-to-end delivery of web applications, including requirement analysis, system design, implementation, testing, and deployment. This experience has given me a disciplined approach to project workflows and a strong attention to detail in documentation and reporting.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am also actively working to improve my German language skills.

I am confident that my technical discipline, structured approach to project work, and ability to adapt quickly would allow me to contribute meaningfully to your team. I have attached my CV for your review and look forward to the opportunity to discuss how I can support ETB Solution GmbH’s projects.

Sincerely,

Md Shahanur Islam Shagor
