I am writing to apply for the Team Lead Accounting DACH (m/f/x) position at YOC AG. While my professional background is in software engineering, I bring strong analytical capabilities, a structured approach to problem-solving, and a proven ability to drive process optimization and automation.

In my previous work as a Web Developer, I was responsible for designing scalable systems, optimizing performance, and standardizing workflows across multiple projects. These experiences have honed my ability to analyze complex operations, identify inefficiencies, and implement structured solutions.

I am particularly interested in YOC AG because of its position in the mobile advertising market and its emphasis on progress and connectedness. The opportunity to contribute to the digitalization and optimization of financial processes aligns with my hands-on mentality and my interest in improving operational efficiency.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical skills and process-oriented mindset can contribute to the YOC team.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
