I am writing to apply for the Founders Associate Marketing & Commercial role at hellomateo. Your mission to strengthen customer relationships for Mittelstand companies through personalized communication is compelling, and the 4x growth over two years shows real product-market fit.

As a Full-Stack & AI Engineer, I work with AI tools daily in my development workflow. I have integrated OpenAI and Replicate APIs into production applications for content generation, personalization, and data processing. I built AI assistants trained on custom datasets and automated workflows that replaced manual operations. This practical experience with AI in real products aligns with your need for someone who actively uses AI tools rather than just having theoretical interest.

One area that particularly interests me is process automation. In my projects, I have built systems that automate lead handling, data processing, and reporting pipelines. I understand how to design workflows that reduce manual effort and scale reliably. While my background is technical rather than pure marketing, I am comfortable working with data, optimizing based on performance metrics, and taking ownership of projects from start to finish.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am looking for a role where I can take real ownership and grow quickly. hellomateo’s startup environment and direct work with the founder team is exactly the kind of setting where I can contribute and develop. I have attached my CV for your review and would welcome the opportunity to discuss how I can support your growth.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
