I am writing to apply for the Senior Paid Social Manager position at Sunlab GmbH. Your focus on data, creatives, and technology to drive measurable results for category-leading clients like Thomann aligns well with my background in building data-driven systems and optimizing performance.

As a Full-Stack and AI Engineer with over 4 years of professional experience, I have developed and deployed systems that rely on real-time monitoring, KPI tracking, and performance optimization. In my previous work, I built a Real-Time Server Health Monitoring dashboard that streams live metrics using Socket.IO, enabling instant visibility into system health and latency. This experience has given me a strong foundation in data analysis, automation, and performance measurement.

One area that particularly interests me is the use of AI for performance analysis. I have worked on projects integrating AI assistants and machine learning models for data processing and automation. I am comfortable with the technical side of tracking, monitoring, and AI-powered performance evaluations, which directly supports the responsibilities outlined for this role.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical and technical skills can contribute to Sunlab’s mission of driving performance marketing forward.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
