I am writing to express my interest in the Senior SEA Manager (m/w/d) position at Sunlab GmbH. Your focus on combining data, smart strategies, and technology to scale performance resonates with my own approach to building intelligent, data-driven systems.

Through my work as a software engineer, I have developed strong analytical skills and a systematic approach to problem-solving. I have experience integrating AI tools and automation workflows into existing platforms, which directly supports your goal of automating processes and extracting maximum value from campaigns.

One area that particularly interests me is the integration of automation and AI into operational workflows. In previous projects, I have built systems that leverage AI for real-time decision-making and automated reporting. I am confident I can apply this experience to help Sunlab identify hidden growth levers and scale campaign performance through smarter automation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to Sunlab’s mission.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
