I am writing to apply for the Improver position at Jaguar Building Services Ltd. With over 4 years of professional experience in software engineering and web development, I bring a practical, hands-on approach to building and maintaining reliable systems.

Through my professional experience, I have developed and deployed full-stack web applications using Laravel, Next.js, and Node.js. I have worked extensively with Linux servers, Docker containers, Nginx, and Apache configurations. I have also set up CI/CD pipelines and managed deployments on AWS and DigitalOcean.

In previous roles, I built RESTful APIs, implemented role-based access control, integrated payment gateways, and optimized database queries for performance. I have experience with real-time features using WebSockets and Socket.IO, and I have maintained production systems with monitoring tools like Prometheus and Grafana.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills align with the needs of Jaguar Building Services Ltd.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
